

# Literacy Rotations - Week 6

## Independent Learning Task

### Learning intention:

To develop an understanding of the possible response options to the threat of a bushfire and improve iPad/video editing skills.

### Your task:

We're heading into a red-hot summer and you have been hired by the Victorian Government to create a 30 second advertisement that aims to inform the general public of what to do if they are under threat of a bushfire.

You will use iMovie to create your advertisement, and you should aim to highlight some (or all) of the following things:

- How to reduce the risks of bushfire
- What you can do around the house to stay safe
- Whether to stay and fight, or evacuate
- Tips for survival
- Who to contact if you see a bushfire approaching
- Anything else you think is important to know!

Use the attached information sheets (or you can research online) to learn about what you can do, so that you can include smart ideas in your videos.

Be creative, informative and persuasive!
